Anadolu Isuzu's well-known medium-size coach series is simply glamorous with its new exterior view. Both interior and exterior of Novo and Novo Ultra models have been redesigned following a comprehensive customer research programme. The new Euro 6 Isuzu engine for Novo Series produces 190 horsepower at 2600 rpm. Novo Series buses offer seat and luggage capacity for up to 29 passengers.

Novo series buses are offered in two different versions to the European markets, one at a "Standard" and the other at "Ultra" comfort level. The interior design, rear suspension, brake system and the comfort equipments of these two versions are designed differently, reflecting the requirements of different areas of use. Isuzu's world-class powertrain, top quality engineering and state-of-the-art exterior view, on the other hand, are completely same in both Novo and Novo Ultra.
